Create a program that asks the user for a number and then prints out a list of all the **divisors** of that number

A divisor is a number that divides evenly into another number (no remainder)

نص الإجابة المطلوبة

* Take two lists, for example

```
List<int> a = [1, 1, 2, 3, 5, 8, 13, 21, 34, 55, 89];  
List<int> b = [1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13];
```

Write a program that returns a list containing **only the common elements** (without duplicates)

نص الإجابة المطلوبة

* Create a program that simulates fetching user data from a server
The program should
*...Print "Fetching user data"
Wait for **3 seconds** (simulate a delay)
* Then print "User data loaded successfully"

نص الإجابة المطلوبة

* ?What happens if we don't use "await" when calling an async function

نص الإجابة القصير

* ?Why can **null** cause serious errors in a program

نص الإجابة القصير

* ?What is the main goal of **null safety** in Dart

نص الإجابة القصير

* ?What is the **null-aware operator (?)** used for in Dart

نص الإجابة القصير

* ?What does the **"??"** operator do in Dart

نص الإجابة القصير

* ?What's the difference between **!"** and **?"** in null safety
